ANDREY LUTSKER

COMPOSITOR

Professional Summary

I am a visual effects compositor based in Vancouver, B.C. My professional experience includes film, television, and advertising. I have a strong artistic visual sense, as well as an eye for detail, light, and color. While the artistic aspect involved in being a compositor is what I enjoy the most, I am technically oriented and always find it a satisfying challenge to come up with elegant solutions to various compositing problems. My past experience working as a 3D generalist has also given me a solid background in CG. I am interested in AI tools and strive to stay up-to-date with the latest technologies and methods in the industry. You will find that I am self-motivated, team-driven, and accustomed to tight deadlines.
